

## News for 02/14/06

---

Hi,

dAM will be offering three different one-week courses in November, 2006. Class size will be limited to 10 each; cost will be \$500 each.

Week 1: Carb Tuning & Modification

Week 2: Dyno Operation & Results Analysis

Week 3: Coordinating On-track and Dyno Data Acquisition for Maximum Performance

Class size will be limited to 10 each; cost will be \$500 each. These classes will be the latest addition to our line of education materials which already includes audio tapes, CDs, and DVDs.

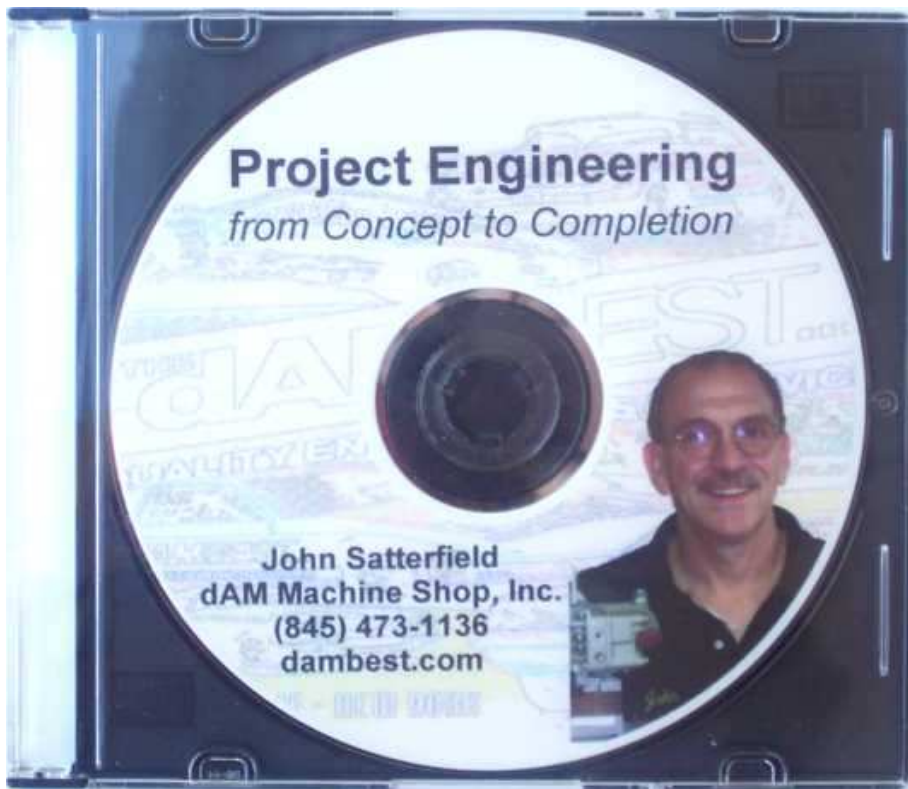

Week 1: Carb Tuning & Modification - explanation

You're welcome to bring a carb of your choice to class to modify during your week.

Things you'll learn include all the different avenues available at each of the throttle positions to maximize your car's performance. Knowing which circuit to adjust and how it affects the carb's output as a whole is the key. You will be able to see how each of the tuning changes affects total output while viewing the carb's performance on wet bench. Our class will teach you how to master the maze of circuitry!

dAM's education sector introduces the DVD, "Project Engineering from Concept to Completion". It covers the Ford project which is outlined on our web site. It is available for \$29.95 plus shipping & handling.

John
