

News for 12/26/06

Merry Christmas and Happy New Year!

I hope your holidays have been good. The PRI show was a wonderful event as usual. It was great seeing old friends and meeting new. Our 4500 series carbs have been selling like hot cakes and we expect the same of the new 2-bbls once the weather warms again.

Preliminary flow figures on the new 1.750" - 4500 series are:

946 CFM at 10" water with 43" inches of booster signal,

1329 CFM at 20" water with 86" of booster signal.

In real terms we expect great throttle response with ever increasing engine performance.

John
