WHAT'S NEW

Compiled by Karl Fredrickson

HAND IT TO YOU

Bell Racing has designed two new performance driving gloves: the Apex and Vision. Bell's Apex performance gloves provide excellent wheel feel and incorporates internally stitched fingers for maximum comfort. The Apex and Vision gloves are made of Nomex and feature an elasticized wrist, knuckle guard, perforated leather palm, and a wrist strap. Bell's full performance Vision driving gloves combine style with outstanding design and comfort. The Apex gloves are available for \$129.95 and Vision gloves are offered at \$109.95. Both the Apex and Vision gloves are SFI 3.3/5 rated and are available in black, red, and blue. *Bell Racing, 800-237-2700*

RACE READY

Jeff Hill of Jeff's High Performance Engines has engines on the shelf for modifieds, stock cars, and hobby stocks. Engines are available in varying configurations to suit your needs and come with a one-night warranty. *Jeff's Performance, 903-868-1109*

TRICK TWO BARREL

dAMBEST says their billet two-barrel carburetor is the most powerful and responsive of its size. Its lightweight, patent-pending billet housing has 200% more booster signal, which in conjunction with dAM's patented emulsion system gives about 50 times the emulsification of other brands that have been modified. dAM has five U.S. patents in fuel emulsion technology incorporated into the metering blocks to reduce droplets to previously unattainable size. Standard hardware makes tuning easy and affordable. When

measured at 28" of water, their 1.750" butterfly flows 750 cfm for 250-600 hp applications, the 1.875" flows 856 cfm for 400-700 hp, and the 2.000" flows 1,009 cfm for 500-800 hp. *dAMBEST, 845-473-1136*
