

## News for 09/04/07

---

Hi,

We've just added a new section to our website's carburetor gallery: Blow-through Carbs. These billet, 4150 style carbs are outfitted with teflon throttle shaft seals in the base plate for using a turbocharger or a blow-through charger. We can set them up for gas or methanol. Do take a [look](#)!

John

Big Billet, Skirted Booster

PS: If anybody has a copy of my 1992 Superflow Presentation on VHS, please contact me.
