

News for 07/29/08

Hi Again,

Pictures of the New Curvaceous look have just been added to the brochure for our 4150 Series.

John

PS: If anybody has a copy of my 1992 Superflow Presentation on VHS, please contact me.

***dAM* 4150 Series Carbs**

"The switch is on"

The *dAMBEST* billet carbs are the most powerful and responsive carbs of their size. Every angle of throttle position is adjustable, and adjustable linkage allows control of the rate at which the secondary is applied.

dAM has five US patents in fuel emulsion technology incorporated into the metering blocks to reduce droplets to previously unattainable size.

dAM's patented, lightweight billet body allows for custom sizes and takes into account air cleaners and air pans to aid air distribution around the booster and through the manifold.

The result is 50% more booster and about 50 times the emulsification of modified other brands. Air cradles the fuel droplet in a totally new way reducing manifold wetting - a major

problem in previous carburetor designs.

Size	Butterfly	CFM at 10" water	CFM at 20" water	HP Range
Small	1.250	528	761	To 650
Mid-size	1.395	650	933	500-750
Large, Skirted Booster	1.585	705	994	650-750
Large	1.585	TBA	1100	750-850

Each carb has its own build sheet and serial number. Pictured is the Big Billet, with Skirted Booster .

*Every dAM carb is serial numbered with it's own build sheet, and wet flow sheet.
