The Ultimate 4150 Carburetor

Hi Again,

The Ultimate 4150 has arrived! Last September we announced that we had started development of the Ultimate 4150 style carb. Here it is fully anodized and ready to ship. We believe it will be the largest, highest flowing in production. Flow bench figures are in now: 1358 CFM at 20" of water. This light weight (8.5 lbs!), fully profiled beauty is intended for applications producing up to 1100 HP while being restricted to the 4150 style carb. See our [Ultimate 4150 brochure](#) for the full list of features.

For those who have always wanted to have a dAMBEST, personally signed, trophy carb for display in the home or office, we will offer a series of serial numbered and signed trophy carbs. These are actual working carbs, signed and mounted for display.

John
