It's here... The *dAM* E-Jet!

Hi Again,

We've been waiting for this and it's finally here: the prototype of the new *dAM* E-Jet. It is pictured below mounted on the equally new *dAM* 1.515" venturi 4150 series carburetor. If you recall, the E-Jet replaces both the float bowl and the main jet and is controlled by the ECU. There is no float and needle to be affected by acceleration forces. You will be able to custom tailor fuel delivery through the ECU.

John

PS: \$250 REWARD for a copy of my 1992 Superflow Presentation on VHS!

dAM E-Jet mounted on new 1.515" venturi 4150 series carb
